Üsküdar İstanbul

During my time as a Civil Engineering student at Yıldız Technical University, I became a professional bicycle mechanic. After practicing this profession as a mechanic and quality control specialist in two different companies, I, along with three other students, established a bicycle house in Üsküdar with the aim of promoting bicycle culture. Through this initiative, which was inaugurated by the mayor, we developed various projects, fostered significant benefits, and engaged with different civil society organizations. However, during this period, I realized that my true passion lay within the software and IT sector. Utilizing the skills I had acquired, I worked for a digital media company for a year, focusing on graphic design, video design, and web development. During this time, I also gained experience with WordPress. Subsequently, I took on the responsibility for social media and website management at a store design firm, where I also gained experience in information technology, proposal drafting, and progress payments. Throughout this period, I honed my skills in HTML, CSS, JS, jQuery, React, Node.js and PHP. Additionally, I had the opportunity to acquaint myself with CRM and Salesforce. I developed various projects using LWC, LWR, Apex, Flows, and other Salesforce development tools.

## PROFESSIONAL EXPERIENCE

### Meka Desing

#### Web Developer

I have created user-friendly and functional websites using HTML, CSS, and JavaScript. I tracked user interactions using tools like Google Analytics to improve page load times and implemented necessary optimizations based on user feedback. I generated quick and effective solutions to resolve technical issues. I designed visuals for social media and product presentations. Additionally, I was involved in preparing proposals, progress payments, and quantity takeoffs.

### Crew Media

#### Designer Developer

I was involved in digital advertising production for various brands in the technology industry. I conducted product, model, and location photo shoots. I contributed to the construction and updating of websites using WordPress. Also I participated in constructing and improving an e-commerce website focused on PC hardware. I gained experience in developing a PC builder robot and implementing a filtering application to balance traffic congestion. I also contributed to the development of a website for a modern educational institution that connects venues and instructors using an appointment system.

### Tandem BikeHouse

#### Entrepreneur-Mechanic

I was involved in establishing and managing the Tandem Bicycle House, which organized events such as bicycle cinemas promoting bike usage for a greener world, workshops, repair and maintenance sessions, encompassing everything related to bicycles. Alongside managing business operations, I conducted bicycle training sessions for children. I fulfilled responsibilities in workshops and maintenance, ensuring their smooth operation. I also took part in drafting projects in collaboration with civil society organizations.

## **Decathlon**

### **Mechanic**

As a bicycle repair workshop mechanic, I managed sales, repairs, maintenance, and staff training. I worked as a quality controller at the main distribution center for Decathlon. I took on responsibilities in competitive analysis and bicycle training program design.

## **Bizero**

### **Mechanic**

I conducted bicycle maintenance and repair tasks. I was involved in spare parts and enhancing user experience.

## **İstanbul Beton AŞ**

### **Intern**

I worked in office duties within the progress payment department at ISTON Inc., a subsidiary of the municipality. I gained experience in quantity takeoffs, progress payments, bidding, and static project production.
